PROFILE

Frontend developer in training at TripleTen with hands-on experience building responsive interfaces, interactive web experiences and TypeScript-based object-oriented frontend code. Technical background also includes audio production and real-world operations, with an emphasis on problem solving and clear user-facing systems.

TECHNICAL SKILLS

HTML5 | CSS3 | JavaScript | TypeScript | REST APIs | DOM manipulation | Forms and validation | Object-oriented programming | Responsive Design | Git | GitHub | VS Code

SELECTED PROJECTS

• Around The U.S. - Bootcamp project

Interactive frontend application with profile editing, cards, modal workflows, form validation and class-based TypeScript architecture. Portfolio demo uses local browser data so no training API credential is exposed.

• Coyote 61 - Live web project

Visual website for a real-estate project with maps and interactive elements focused on territory comprehension and navigation. Live at coyote61.mx.

• Filo Barberia - Portfolio demo

Responsive static concept with horizontal navigation, interactive sliders, bilingual content and optimized media, integrated as an isolated project inside the portfolio.

• Devatec - Personal project, in progress

Platform concept focused on simplifying repetitive parts of electronic-design workflows and integrating technical tools into a proprietary interface.

EDUCATION

• TripleTen - Web Development Bootcamp, 2026

Practical training in frontend development, JavaScript, TypeScript, REST APIs, DOM, validation and object-oriented programming.

ADDITIONAL BACKGROUND

Technical and creative experience in audio, recording, editing and mixing, plus operational experience in customer-facing environments. This background supports a systems-oriented approach to software and interface work.
